

MIKROTIK

MUM #29

Time	Action
08:00	Check-in and Exhibitor hall (Scenic room) opens
09:00	Opening and introduction, new products by Normunds Rustanovics (MikroTik, Latvia)
09:30	Volume Configuration with RouterOS by Mike Everest (Duxtel, Australia)
10:15	ExtremeWireless by John Gorenflo (MAF, USA)
10:45	Resolving Wireless Disconnects and Improving Uptime by Jonathan Walcher (Brink Networks, USA)
11:15	Access Point Redundancy by Lorenzo Busatti (LinkWave, Italy)
12:00	Lunch time
13:00	Rogue AP Detection and Mitigation by Greg Sowell (Greg Sowell Consulting, USA)
13:30	3G Cellular Presentation by Brian Vargyas (Baltic Networks, USA)
14:15	Creating Coverage Maps and Link Path Analysis by Dennis Burgess (Link Technologies, USA)
15:00	Raffle and closing of MUM

Times are approximate, watch presentation progress to make sure you don't miss the next one.

USB + Power jack + Chains + RAM + License

RB750UP

- + Same as regular RB750
- + USB port
- + 24V Power Output on four ports
 - * Controllable PoE out
 - * SNMP support
 - * Voltage and current monitors
- + Can power PoE capable devices
- + Less cables and PoE injectors
- + Available in December

Groove 2Hn

- 2GHz
- Same tough construction as the Groove 5Hn
- Available in November

RB751

- 2GHz / 802.11n
- 1W output power
- MIMO antennas
- High power radio
- External MMCX
- USB 2.0 port
- RB751U already available
- RB751G in December

RB 1100AH

- New rackmount core router
- New CPU and board design
- Available end of October

RB 1100AHx2

- Even faster performance
- Dual core CPU system
- Completely new device
- Same form factor and case
- Fastest RouterBOARD to date
- Available in November

RB2011

- Low cost series
- Rackmount or Desktop
- 5xGigabit, 5x100Mbit
- SFP/USB/WiFi models
- Available december

	L	LS	US	US-2HnD
Type	Board	Board	Desktop	Board
SFP	-	+	+	+
USB	-	-	+	+
Wireless	-	-	-	+
Serial	-	-	+	+
LCD	-	-	+	+

RM - 1U Rackmount models
 IN - Indoor/desktop models

For example RB2011US-2HnD-IN. Currently 7 variants planned to release gradually from December to February.

RB201 1L-RM

Bandwidth Management

- MikroTik RouterOS adalah salah satu OS/ aplikasi tercanggih (dan mudah dikonfigurasi) untuk melakukan bandwidth management.
- Bandwidth management dilakukan dengan menggunakan shaper dan scheduler
 - Shaper: TOS dan PCQ
 - Scheduler: FIFO dan SFQ
